

## Review of the educational and professional program

### "Pharmacy, industrial pharmacy"

Level of higher education - second (master's)

Branch of knowledge - 22 Health protection

Specialty - 226 "Pharmacy, industrial pharmacy"

TBD Pharmatech specializes in active pharmaceutical ingredients (APIs), advanced intermediates. The combination within one enterprise of production that meets GMP requirements with strong research and development requires the involvement of highly qualified specialists in the field of industrial pharmacy, whose training is successfully carried out at the State Higher Educational Establishment Ukrainian State University of Chemical Technology, at the Department of Pharmacy and Technology of Organic Substances.

Analysis of the content of the educational and professional program for the preparation of masters in the specialty "226 Pharmacy, Industrial Pharmacy" showed that the educational components of the program allow future masters to acquire knowledge, skills and competencies that contribute to the applicant's development as a qualified specialist. The training program harmoniously combines the theoretical and practical training of applicants, which allow them to gain in-depth knowledge, as well as skills in mastering modern methods and technologies that are necessary to solve practical problems in the professional field. The disciplines of the educational and professional program are focused on the current and strategic aspects of the development and production of modern pharmaceuticals and meet the model of a competent graduate, the requirements of employers and the interests of applicants for education.

The structure of the program is consistent with the tasks of the educational process formulated by the goals.

The developed educational and professional program for the specialty "226 Pharmacy, Industrial Pharmacy" is sufficient for the qualitative implementation of the educational process, the achievement of the specified goal and program results. This gives reason to recommend the curriculum for the preparation of masters "226 Pharmacy, industrial pharmacy" for inclusion in the educational process.
